Resource Extraction, Space and Resilience

International Perspectives

Juha Kotilainen, University of Eastern Finland, Finland

Series: Routledge Studies of the Extractive Industries and Sustainable Development

While much of the current research on the extractive industries and their socio-environmental impacts is region specific, *Resource Extraction, Space and Resilience: International Perspectives* critically explores the current state of the extractive industries sector from a uniquely global perspective.

This text will appeal to a wide range of scholars with an interdisciplinary interest in the extractive industries and natural resource management, including human geographers and social scientists with a focus on the relations of humans and societies with their physical environments.
