

**Name:** Christos Georgiades

**Job title:** Owner and director of 3MC Trading Company

**Career:** I have a diploma in Electrical Engineering and a Bachelor's degree in Telecommunications and Electronics. My studies are not really related to my job, but when I realized that we have a big problem about plastic recycling in Cyprus, I did some research about it and from then, I focused on this and started to working on this aspect.

**Responsibilities:**

- Management and the organization of the company
- Offering training to new personnel
- Looking for looking for new customers in and out of Cyprus.

**Essential skills for my Job:**

- Managerial skills
- Organization skills
- Communication skills
- Collaboration skills

**What I need to know for my Job:**

- Knowledge about electronics and machines
- Knowledge about the different types of plastics

## 3MC RECYCLING

The company was founded in 2010. We engage in recycling **plastic waste, cartons and other recyclable materials** within the Cyprus market. We specialize in the purchase and international sales of all grades of plastic waste, in baled and grinded form or plastic granules. We also actively trade in domestic and international plastic waste, commercial/industrial plastic waste, and consumer plastic waste. We process paper waste from post-consumer waste such as material discarded after consumer use, old magazines, old newspapers, office paper, old telephone directories and residential mixed paper.

How we work: At first, drivers go out to our customers and collect plastic and paper. Then they return to the factory and empty the mixed materials in a specific place. After that, factory employers sort out these materials and they separate the plastic from the paper and also materials which are not recycled.

Project: As a factory we promote a project which concerns the collection of plastic caps, in order to inform primary school students about rheumatic and musculoskeletal disorders, environmental issues and the value of recycling. During the project, students were collecting plastic caps and the money from their recycling will support the Rehabilitation Association's home rehabilitation program and also

This project has received funding from the *European Union's Horizon 2020 research and innovation programme* under grant agreement No 665100.

## **Owner and director, Christos Georgiades, 3MC Trading Company**

I am the owner and director of 3MC Trading Company, a recycling plant. I have a diploma in Electrical Engineering and a Bachelor's degree in Telecommunications and Electronics. I have a diploma in Electrical Engineering and a Bachelor's degree in Telecommunications and Electronics. My studies are not really related to my job, but when I realized that we have a big problem about plastic recycling in Cyprus, I did some research about it and from then, I focused on this and started to working on this aspect.

I am responsible about the management and the organization of the company. Furthermore, I am looking for new customers in and out of Cyprus and organize and offer trainings to new personnel. Thus I need to have managerial, organization, communication and collaboration skills. Also, knowledge about electronics and the different types of plastics is essential.
