

At a time like this—when the coronavirus pandemic is still sweeping the globe—we need some happy news. ..

We all know the results of World Happiness Report from last year, it was a three-peat, **Finland** kept **#1** place, as Happiest Country in World.

BUT, as always, it had come as a surprise to some people...

When you compare beach at Hietasalo island the likes of Hawaii or Nice, for example, it might make you wonder how happy anyone could be while standing out in the cold these days.... However, in spite of the not-so-mild weather conditions, the country still tops the rankings.

BUT, did you hear about, that **KUOPIO** is **#2 best** city in Finland?

So I`m really HAPPY to leave in the **happiest country**, in the **2nd best city** of Finland, **Kuopio** and work "**in the middle of (K)nowhere**"

at **University of Eastern Finland**, ranked to be **in top 50**, the only Finnish university on the lists ranking the **world's young universities**.

All facts above underpin what it means HAPPINESS: the more I`m working inside the better I feel outside by Nature, finding alertness again. As we are **embedded in Nature here in Kuopio**, and it`s patterns touched all of my senses, I dare to share **my link** with you /,again ... 😊/.

Saboly György
